First & Last Name

Start Date _____

Costs and terms

The standard cost is £300 plus VAT for a one garden account, but WeWeed members will have access to a garden each for just £70 inc. VAT. The group account allows you to take a step towards becoming a professional designer without committing to the expense of a professional account. When you have a few more design customers, and need to use it more regularly, you can be confident in paying for a personal account directly with Shoot.

We ask that you stay a supporting member for the entire term that you use the group account. It costs a lot of money to maintain the site and this small monthly contribution goes towards supporting it and growing our community so that we can secure more benefits and advertising revenue to sustain us. If you downgrade you will lose your access to the software. The £70 is a one-off payment and cannot be refunded for any reason.

At the end of each 12 months subscription, we will need to reassess whether there is enough of us to sign up for another year. If this is not so, or for any other reason it is not viable to continue with, such as business closure or change of terms with Shoot. You will be given 2-weeks-notice ahead of your subscription end date, so that you can finish off any gardens you may be working on.

Login and privacy

We will have one shared login and one garden each. You will be able to see and access each other's gardens so there will be an element of trust. You will all be able to work on your gardens at the same time.

You need to name your garden with your business name (if you have one) and/or own full name, not the customers' names so we know whose is whose. **Gardens we can't identify will be deleted.**

DO NOT click onto other gardens in the SHOOT site as you might accidentally delete or change something.

DO NOT reset the password since you will lock everyone out. Please ask on the WhatsApp group or message another group members on the WeWeed site if you forget it.

DO NOT SHARE the login information with anyone else outside of the group.

As with the paid single user account £300+Vat, when you have completed a garden design you will need to save it as a PDF and delete it before starting another design. You can buy another garden if you wish at £70 (providing there are any spare)

The software is not very intuitive but there are group online tutorial videos by Shoot that are accessible on the WhatsApp group and [Shoot](#) itself. [Justine Hutchinson](#), runs beginners 1-1 sessions. Please contact her directly. We also have a dedicated chat group on WhatsApp so that you can ask questions support each other, the link is accessible from your WeWeed profile.

Happy planting 😊
